FESTA
SYSTEM

ALLOW US
TO INTRODUCE

HERE AT FESTA,

we do not want to sell you doors. We want to give you
an opportunity to create the entrance that tells a story...

ABOUT

YOU

While browsing our extensive selection, you will find plenty of
different models, ranging from conventional to avant-garde,
from monochromatic to playful and quiet to monumental, but
they all have one thing in common - welcoming you home.

FAVORITE PART OF THE DAY IS

COMING HOME.

Keep it warm and safe with carefully designed technology applied as a standard with Festa doors.

WHY ALUMINUM?

Aluminum is a very stable material, with minimal extensions and contractions due to changes in ambient temperature. It meets energy standards providing excellent thermal insulation as well as security, sound insulation and is weather proof.

Strong, but lightweight, very durable and low-maintenance, aluminum is resistant to harsh weather conditions and will not change its appearance or properties during time, ensuring an extended product life. There are different finishes and literally hundreds of colors for you to choose from -and you will never need to repaint it again!

HIGH LEVEL OF INSULATION

IMPROVED STABILITY AND ADVANCED SECURITY
achieved by integration of new materials and cleverly
engineered system.

- 1** 90 mm wide leaf for more stability, strength, acoustic and thermal insulation
- 2** 3 mm thick aluminum sheet
- 3** Thermal and acoustic insulation layer filled with PU rigid foam
- 4** Additional insulation in profiles
- 5** 3 revolving EPDM seals ensure optimal thermal insulation and water tightness
- 6** Barrier-free entrance with only 20 mm high aluminum sill with thermal break
- 7** Optional stainless steel base

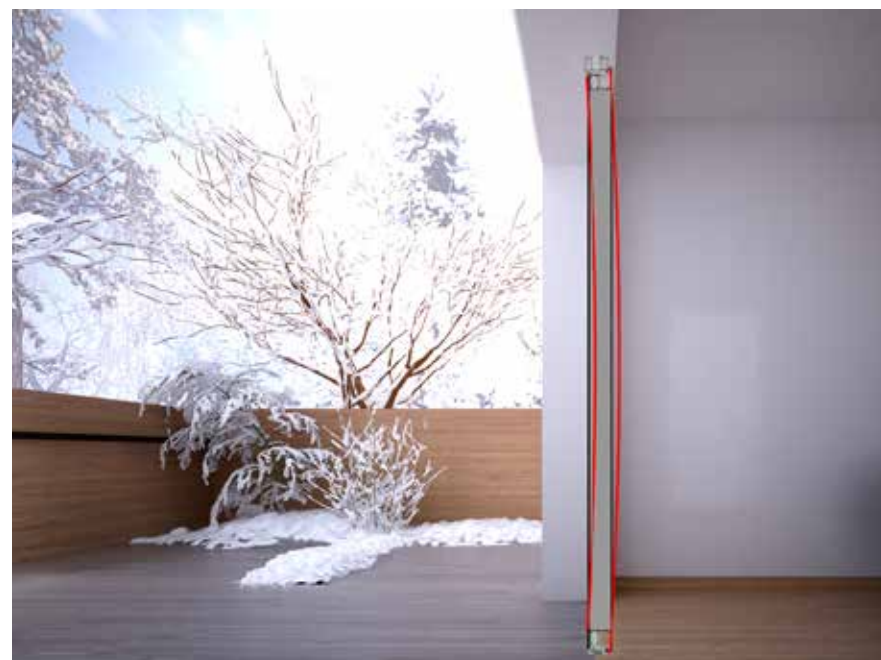

SCHÜCO

PROUD TO PARTNER WITH THE BEST

Complete system inside our doors is made by Schüco, providing **premium quality**,
German engineered, highly insulated aluminum system.

All doors with glass inserts are fitted with **3-layer laminated safety glass**
(VSG 4.4.2 + 6 float glass + 3.3.2 VSG Ug 0,6 W/m²K).
This guarantees increased security and resistance to accidents or
burglaries as well as meets latest energy standards.

WITHOUT BIMETALLIC EFFECT

Due to extreme temperature differences, mostly occurring in winter and summer, door leaf tend to deform, making closing and locking the door difficult. Festa doors come with special technology, increased thermal bridge and optimal sealing to prevent bimetallic effect and ensure the stability of the door regardless of climatic conditions.

DESIGN

EVOLUTION

All Festa doors have concealed leaf profiles on the interior, providing elegance and purity of design. There is no other option here – we are giving you the ultimate solution as a standard one.

PRECISE HINGES

The barrel hinges from Schüco achieve the highest possible load-bearing performance with a maximum load transfer while remaining visually attractive. The hinge also features optimized adjustment without having to remove the leaf.

Festa doors are equipped with three barrel hinges in stainless steel look as a standard, or in profile color for surcharge.

CHOOSE
QUALITY

MODEL: FD44
MATERIAL: FSC01 / FSC12

IT IS NOT JUST A LOCK, IT IS
A CAREFULLY ENGINEERED
SYSTEM OF HOME

PROTEC TION.

OPTIMAL SECURITY

By default, Festa doors are equipped with a multi-point stainless steel RC 2 security lock. Key-operated, five-point lock with main hook, 2 pin bolts and 2 hook bolts in the additional lock cases, offers solid security. Steel pinbolts provide a secure hold in the door frame, while hook bolts make pushing the leaf and the frame apart harder.

The cylinder can be locked from both sides - even if there's already a key in the lock. Besides great security features, the **FL01** lock has smooth movements, a soft-close option and it is maintenance-free.

LOCK: FL01

RC 2
SAFETY

LOCK: FL03

LOCK: FL02

ADVANCED SECURITY **KFV**

Sometimes optimal is not enough, so we provided additional locking systems for you to choose from.

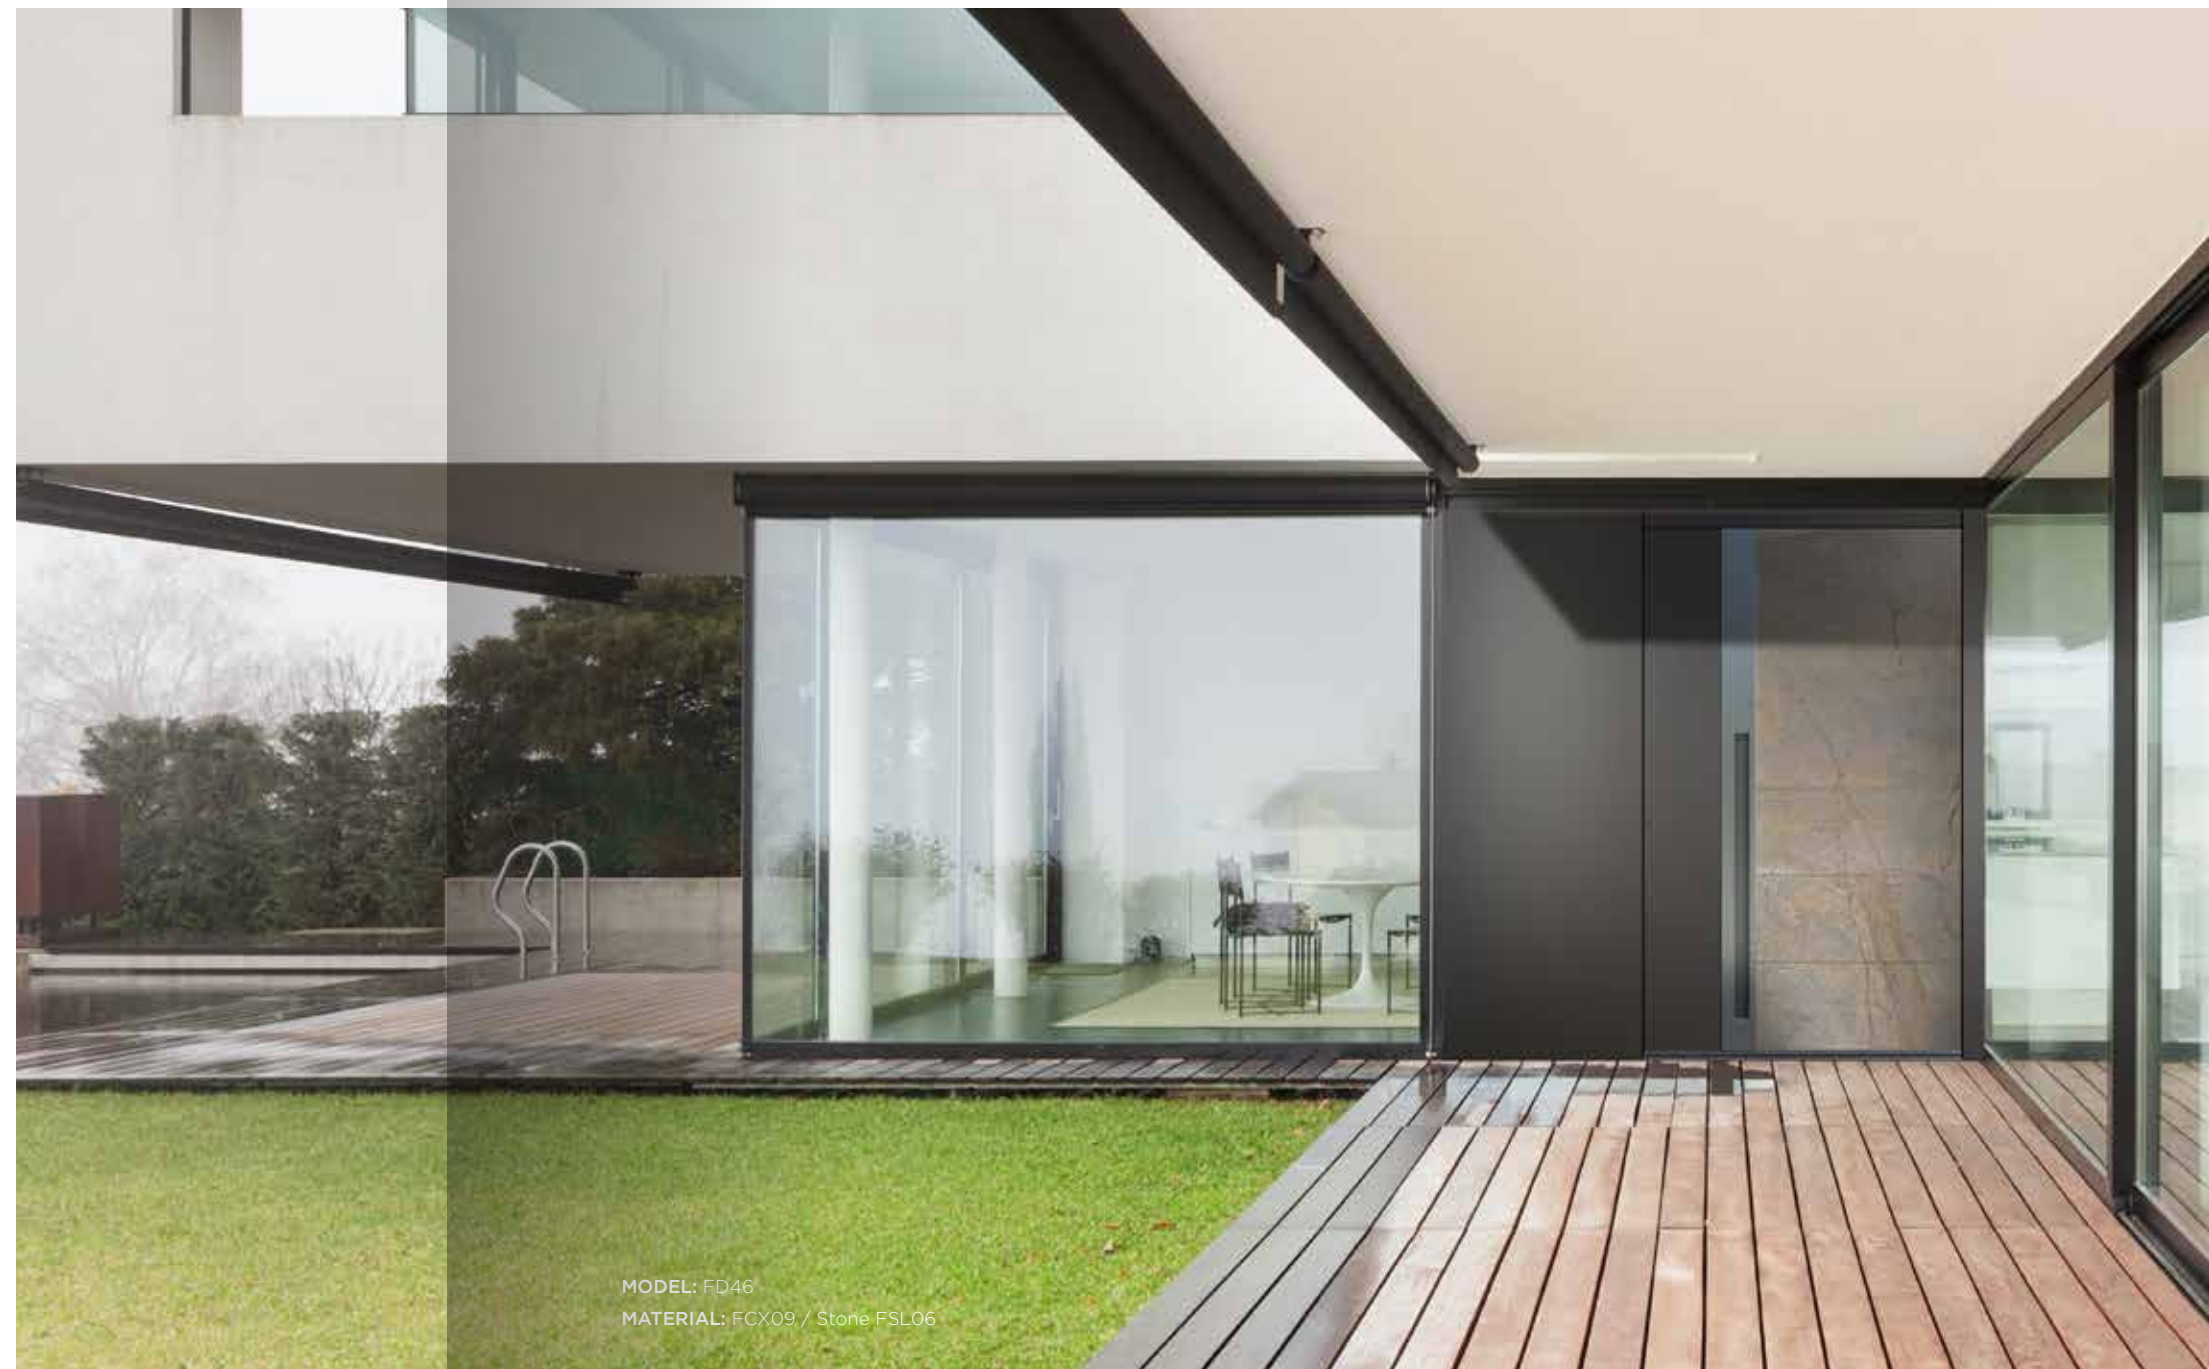

FL02 is a five-point lock combining security and ease of use. This system provides both mechanical and automatic locking, adding extra layer of safety for your home. The door is automatically locked as soon as it is closed, so you will never have to wonder whether you left it unlocked again.

FL03 is half-motorized five-point lock going even further when it comes to comfort and security. While having all the features of FL02, it also makes the usage of the key unnecessary. From the inside, it's unlocked via lever (comes with child lock block) and from the outside it can be combined with any access control system (e.g. finger scanner).

COMPLETE ENTRANCE SOLUTION

Adding side sections or transom windows is always a right answer. Depending on your current situation or idea, there are several options and many more combinations for your entrance to be a whole.

With maximum height of 2500 mm and width of 1250 mm, Festa doors are **monumental and strong**. Make them even more impressive by adding side sections and/or transom light.

CREATED FOR YOU.

Aesthetics of design is a very personal matter. Partly, it lives in the symmetry, texture, flow, color or the interaction of sun and shadows, but in the end, it depends on your taste - what amazes you may not thrill your neighbor as much. We also have an opinion about design - it should be perfect for you. It should fit your lifestyle and **express your personality.**

CHOOSE COLOR

There is a story behind the color.

While white is pure, yellow is carefree and red simply wants power. Blue means discipline, but green is calming and fresh. Brown stands for dignity and black for strength and sophistication. So, which one are you?

EVERY DOOR TELLS A STORY.

IT STARTED AS AN IDEA...

...sketched on the back of the receipt, evolved to a shop drawing and came to life in the production process. Every line, shade, rounding and dimension is the result of synergy of the creative process of designers with expertise of our engineers and experience of artisans - so you can feed your needs for modern, function, quality and good value for money.

SCRATCH PROTECTION

To protect your door from possible scratches around the keyhole, we designed special stainless steel key lock frames. **Pick your favorite one!**

FR01

FR02

FR03

FR04

DOOR BASE FOR ADDITIONAL PROTECTION

FS30

FS90

You can follow the trend and go base-free, but if you want to provide additional protection for your door choose quality stainless steel base.

HOW DO YOU WANT IT FRAMED?

Every model in our collection comes in two different frame options.

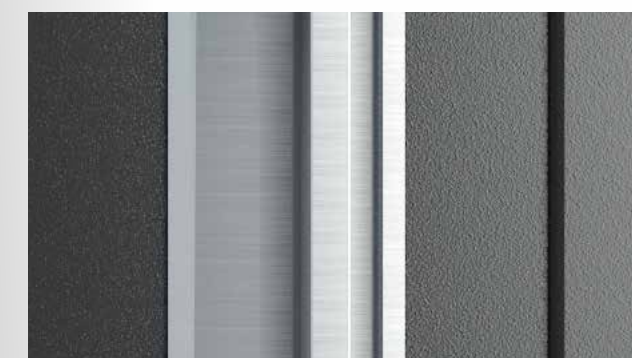

Flush frame: Modern design at its best - flush looks for the visual harmony.

Rebated frame: Going for a bit of a classical look? Choose the charismatic rebated frame with soft, elegant lines.

LANGUAGE OF TEXTURE

Give your sense of touch a special treatment and your door a signature with different surface treatments. What suits you better, **sharp grain or smooth matte?**

Fine structure

Grainy, robust surface with a subtle gloss effect, gives the sense of firmness and enhances the luxury of color. Combine these with excellent scratch resistance and durability.

Smooth matte

Our standard finish is flat and non-textured with very gentle reflections giving a touch of elegance, while remaining stable and low-maintenance.

IT STARTS WITH A GRASP

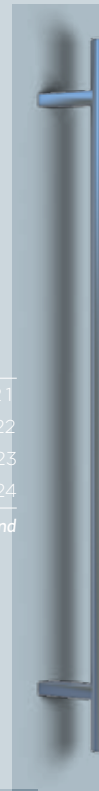

We handled this most frequently used part of your entrance with special care. Made of stainless steel to ensure firmness and durability with ergonomic design making it usage comfortable.

TREAT YOUR ENTRANCE WITH MODERN, DESIGNER HOUSE NUMBERS.

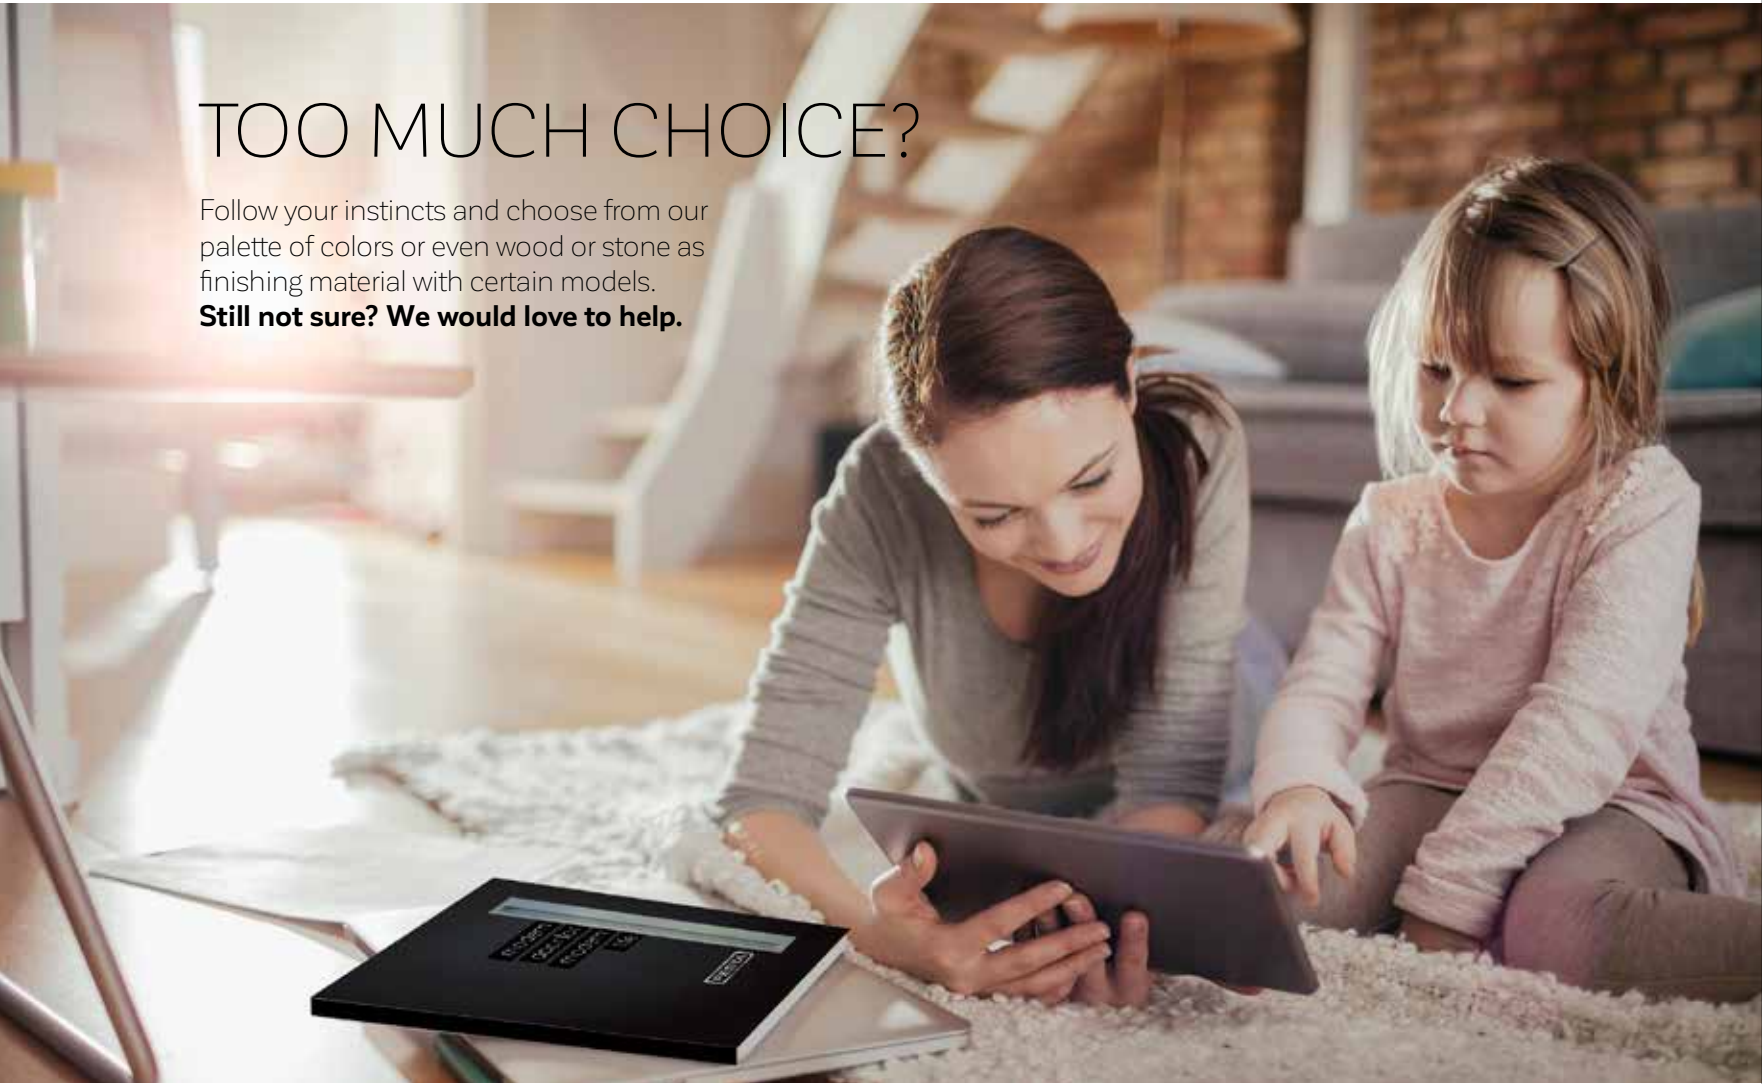

Either three dimensional or imprinted, stainless steel or aluminum, our house numbers are the final touch rounding up the story.

MAKE THEM CURIOUS

Reveal just enough and let the light in by selecting the model with glass insert. Choose between different types of glass for different resulting atmospheres. Glass used for inserts, side section or transom windows is always triple-glazed with VSG safety glass.

TOO MUCH CHOICE?

Follow your instincts and choose from our palette of colors or even wood or stone as finishing material with certain models.
Still not sure? We would love to help.

*Due to print and/or production conditions, it is possible for colors and patterns to differ from images shown in brochure or website. Our distribution partner will gladly advise you and show you the original samples.

livius®

Livius is our standard cylinder equipped with scanning and anti-drilling protection as well as two steel pins. It is lockable on both sides and can be used if the key is in the lock on opposite side.

janus®

The reversible key system Janus meets the highest standards of safety, functionality and design. It has exceptional anti-drilling protection and resistance to pressure and wrenching. It is lockable on both sides.

Each high security cylinder comes with a personal security card serving as an identification when re-ordering a cylinder or a key.

FINGER SCANNER

Leave the conventional behind and choose a finger scanner as a door un-locker - make your finger a key. Finger scanner from ekey is simple, modern and functional, fits our doors perfectly and **makes your life much easier.**

KEYPAD

Choose your digit code and use it for unlocking the door. This stylish unlocking system blends into the door. It can store up to 99 different codes, so every user can have its own code.*

*available with lock FLO3

CHOOSE COMFORT

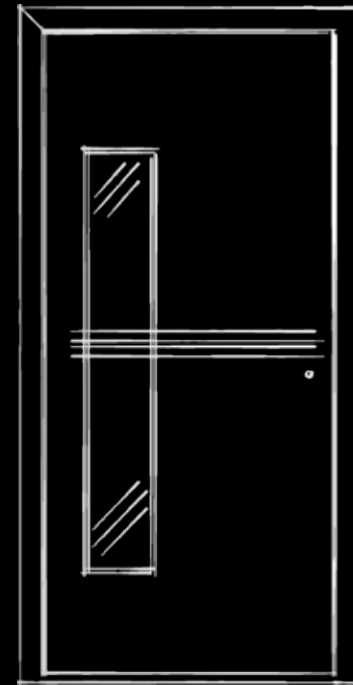

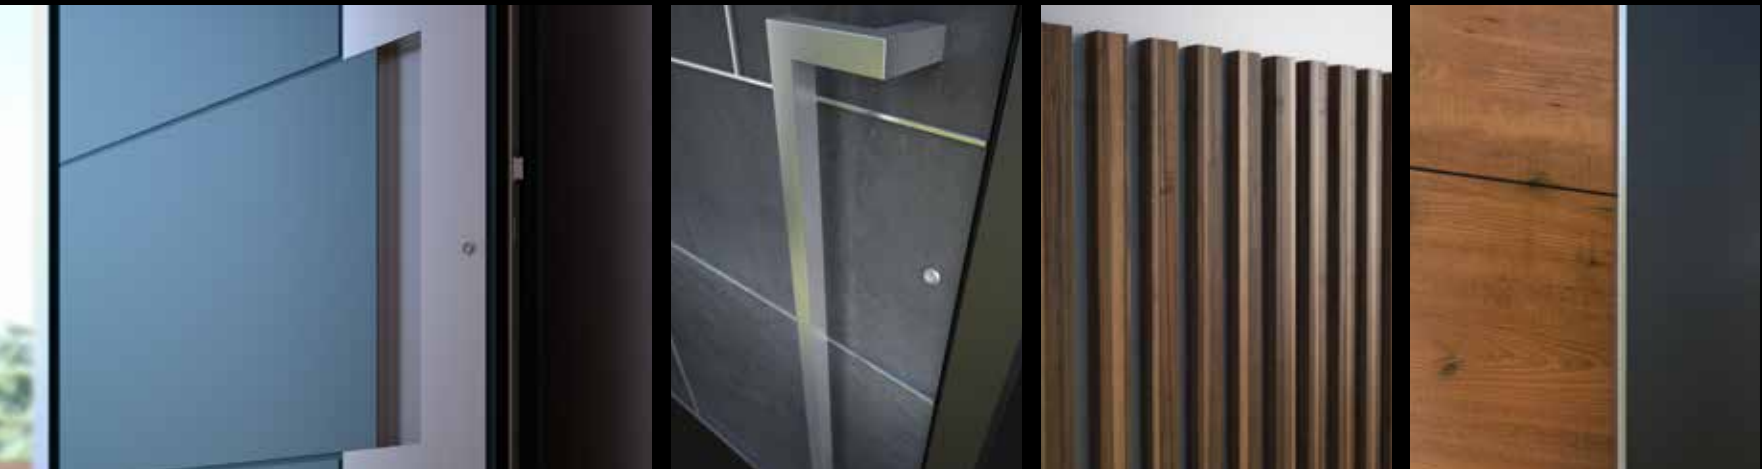

YOUR TIME IS WAY TOO PRECIOUS TO
WASTE IT SEARCHING FOR KEYS.

DIGITAL DOOR VIEWER

Digital Door Viewer display an image of the person at your door, providing a safe way to identify visitors before opening the door.

DESIGN

IT

Maybe you already found a model you fell in love with. It is exactly what you were looking for. However, there is a chance you found something, but it is not just quite right for you. That is exactly why **we gave you the freedom to design your own door**, and we will do all the technical work.

YOURSELF!

Contact us to tell you more.

CHOOSE SMART

ISN'T IT GREAT TO HAVE
EVERYTHING DONE AT
ONE PLACE?

Other than front doors, we are offering your **matching windows, all-glass systems, garage doors and a whole lot of custom made solutions.** Trust our engineers to fully equip your home with intelligent systems using innovative technology and modern materials in cooperation with brands like Schüco and Hörmann. Because, the best gift you can give your family is time.
